Sectors Residential Groundworks

## Residential Groundworks

**Working with housing developers throughout the North West, we have established a great reputation for delivering large scale projects for our key client's. Our groundworks team specialise in providing cost effective and timely solutions for even the most challenging of sites.**

We are experts in all aspects of groundworks and foundation construction, we have the skills and experience to deliver speedy and economical solutions ranging from bulk earthworks through to external works and finishing.

Our groundworks capabilities include:

- **Demolition and earthworks**
- **Foundation solutions** including piling and vibro-piling
- **Floor construction** including block and beam, reinforced concrete, jetfloor and raft foundations
- **Drainage and service installations**
- **Retaining walls** including gabions, reinforced concrete, king-post, stepoc and sheet piling
- **External works**
- **Footpath and highway installation** up to adoption
- **Driveways** including tarmac, block paving and resin bound surfacing
- **Street lighting** and road signage

We work closely with a team of geotechnical experts to provide end-to-end remediation strategies. This can include scoping the

site investigation works, specifying testing regimes, delivering remediation works and carrying out bulk excavations. Our remediation capabilities include surfacing, soil stabilisation, bioremediation and asbestos removal.
