[Corporate Values](#)Health, Safety, Environmental and Quality

Health, Safety, Environmental and Quality

Health and Safety

Westshield's people are our greatest asset and we are committed to ensuring their safety and wellbeing. We believe everyone involved with our projects has the right to return home safely at the end of the day.

Our people are empowered to make the right decisions. Our commitment is led from the top down, with our Business Division leaders setting the very highest of standards of health and safety performance across the business.

This approach is supported by our ISO 18001 accreditation designed specifically to help our staff to carry out their work safely. We have a comprehensive staff training matrix, which ensures that all our staff are appropriately trained and have the right skills, knowledge and competencies to do their jobs safely.

Behavioural safety is a key part of our approach, and we regularly hold management safety tours, 'stop and consider days', and regular audits to ensure that this approach is an intrinsic part of our business.

Environmental

Westshield is experienced in working in highly sensitive environments, ensuring we protect the ecology and wildlife during the demands of project delivery.

Our diverse range of project brings us in to contact with heritage sites, conservation areas, areas of outstanding natural beauty and sites of special scientific interest, and we are fully conversant with the requirements of working in these areas.

We are ISO 14001 accredited and have highly trained staff to ensure the strictest levels of environmental compliance.

Quality

Client satisfaction drives everything we do, and we are committed to delivering a 'right-first-time' approach.

Our holistic approach to quality ensures that we achieve the right outcomes throughout the project life-cycle. We understand the importance of understanding every bit of detail about the project, and our staff bring the technical and managerial skill to deliver on our client's requirements. They are fully supported through our

ISO 9001 policies and procedures, as well as comprehensive review and auditing regime.
